Setting up your TV

Installing remote control batteries

To install remote control batteries:

- 1 Open the battery compartment.

- 2 Insert two AA batteries into the battery compartment. Make sure that the + and – symbols on the batteries match the + and – symbols in the battery compartment.

- 3 Close the battery compartment.

Notes:

Make sure that you match the + and – symbols on the batteries with the symbols in the battery compartment.

Do not mix different types of batteries or old and new batteries.

If you do not intend to use the remote control for an extended period of time, remove the batteries to prevent leakage.

Do not try to recharge batteries non-rechargeable batteries. They may overheat and rupture.

Connecting an antenna or basic cable

To connect an antenna or basic cable (no cable box):

- Connect one end of a 75 ohm coaxial cable to the antenna or basic cable wall jack, then connect the other end of the cable to the **ANT. IN** jack on the back of your TV.

Notes:

Always unplug the coaxial cable when you move your TV.

If you use an antenna to receive analog TV, the antenna should also work for digital TV (DTV).

If you want to switch between antenna and cable, install an antenna selector.

If you need help connecting cable TV, contact your cable TV provider.

Connecting a cable or satellite box

Note: Installation methods may vary depending on the type of cable or satellite box. Contact your cable or satellite provider for more information.

To connect a cable or satellite box:

- 1 Connect a 75 ohm cable to cable or satellite TV wall jack, then connect the other end to the **Antenna IN** jack on the cable or satellite TV box.

- 2 Connect a 75 ohm coaxial cable to the **RF OUT** jack on the cable or satellite TV box, then connect the other end to the **ANT. IN** jack on the back of your TV.
