Locate the TV Code(s) for your brand of television.

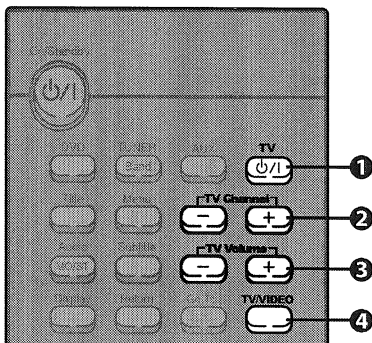

STEP 7 - PROGRAM REMOTE TO OPERATE TV

You can program the DHT7100 remote control to operate many brands of television.

- Find the TV code(s) for your brand of television.
 - If your brand is not listed, you will not be able to program the remote.
- Point the remote at your television.
- While holding down the TV POWER ⏻ button, press the 2-digit number listed for your brand of television.

- If your TV powers on or off, programming is complete.
 - If the TV did not power on or off, try the other codes for your brand until you find one that works.
 - Not all TV models can be programmed.

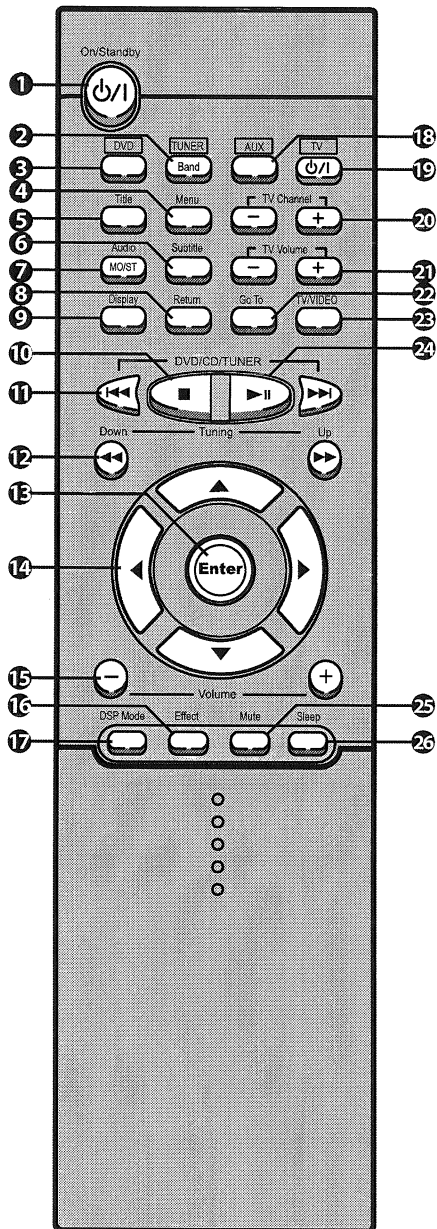

Use these keys to control your television.

TV Control Keys

Once the remote is programmed, use the following keys to control your television:

- Press the TV POWER ⏻ button to power your TV on or off.
- Press the TV CHANNEL +/- buttons to select the next or previous channel on your television.
- Press the TV VOLUME +/- buttons to adjust the volume level on your television.
- Press the TV/VIDEO button to select the TV's video input(s).
