

Remote Control Functions

Eject Button: Press this button to eject a disc from the BDS receiver's built-in disc player. Before pressing this button, make sure no objects are blocking the disc slot opening.

Power Button: Pressing this button toggles the BDS receiver between the On and Standby modes.

TV Power Button: After you program the remote control, pressing this button turns the TV's power on and off. See *Programming the Remote*, on page 18.

Disc Button: Pressing this button selects the BDS receiver's built-in disc player as the system's active audio and video source and plays a disc that has been inserted into the player. Pressing this button also puts the remote control into the disc player control mode. See *Using the Disc Player*, on page 24, for details. NOTE: Pressing this button when the BDS receiver is in the Standby mode will switch it on.

Radio Button: Pressing this button selects the BDS receiver's built-in FM radio as the system's active audio source. Pressing this button also puts the remote control into the control mode for the radio. See *Using the Radio*, on page 26, for details. NOTE: Pressing this button when the BDS receiver is in the Standby mode will switch it on.

iPod Button: Pressing this button selects an iPod inserted in a connected The Bridge IIIP dock (available separately) as the system's active audio source. Pressing this button also puts the remote control into the control mode for the iPod. See *Listening to Your iPod/iPhone*, on page 26, for details. NOTE: Pressing this button when the BDS receiver is in the Standby mode will switch it on.

Aux Button: Pressing this button selects the receiver's active rear-panel audio input as the system's active audio source. Repeatedly pressing the button cycles through all of the rear-panel audio inputs. See *Listening to Audio Sources*, on page 27, for details.

Pressing this button also places the remote into the auxiliary-component control mode, enabling the remote to use any pre-programmed and/or learned functions. See *Listening to Audio Sources*, on page 27, for details. NOTE: Pressing this button when the BDS receiver is in the Standby mode will switch it on.

Settings Button: Pressing this button displays the BDS receiver's Settings menu. See *Settings Menus*, on page 20, for details.

Repeat Button: When the BDS is playing a Blu-ray Disc recording or DVD, pressing this button cycles through the following repeat modes: Chapter, Title, All, Off. When the BDS is playing a CD or listening to media stored on an iPod or USB device, this button cycles through the following repeat modes: Track, All, Off.

A-B Button: Pressing this button activates the A-B repeat mode. The first press sets the "A" repeat point; the second press sets the "B" repeat point and begins repeating the section of the program between the two points. Pressing the A-B button while the A-B repeat mode is active cancels the A-B repeat mode. This feature works both for the built-in disc player and for content from a USB device. NOTE: This feature is disc-dependent. Some discs do not allow A-B repeat.

Display Button: When playing Blu-ray Disc and DVD recordings, pressing this button activates a bar display containing information about the currently-playing disc or program. The button does not function when the BDS is playing material from an iPod, a USB device, an auxiliary source or the radio.

Numeric Buttons: Use these buttons to enter numbers for various items.

Clear Button: This button clears an incorrect entry made using the Numeric buttons.

Find Button: Pressing this button during disc playback activates the search function, allowing you to jump to a specific location on the disc. You can find a location by title, chapter or time. NOTE: This feature is disc-dependent. Some discs do not allow finding locations by title.

Home Button: Pressing this button returns the on-screen display to the Home screen from whatever screen is active when the button is pressed.

Surround Button: Pressing this button cycles through all of the surround-sound modes that are available for the active program. Each press of the Surround button will change to the next mode in line. A pop-up display will appear, showing the modes as you cycle through them. NOTE: Not all surround modes will be available for all programs. See *Surround-Sound Modes*, on page 24, for more information.

Options Button: Pressing this button displays any available options for the item that is active at the time the button is pressed. When listening to an Aux source, pressing the Options button lets you adjust the audio delay to eliminate "lip sync" errors between the sound and picture when watching video programs with sound playing through one of the receiver's rear-panel audio inputs. See *Listening to Audio Sources*, on page 27, for details.

Cursor Controls: Use these buttons to navigate through items on the on-screen menu.

OK Button: Press this button to select the highlighted item on the on-screen menu.

Exit Button: Pressing this button exits the current on-screen menu and displays the previous screen.

Top Menu Button: Displays the top menu of the Blu-ray Disc recording or DVD that is playing. NOTE: This feature is disc-dependent. Not all DVDs have top menus. If the DVD has no top menu, pressing the Top Menu button may display the disc menu, depending on how the disc's menu system was authored. See *Using the Disc Player*, on page 24, for details.

Pop-Up Button: Pressing this button while playing a Blu-ray Disc recording or DVD displays its disc menu. NOTE: This feature is disc-dependent. Not all DVDs have pop-up menus. If the DVD has no pop-up menu, pressing the Pop-Up button may display the disc menu, depending on how the disc's menu system was authored.

Previous/Step Button: Press this button once to skip to the beginning of a track or, when viewing photos, to the previous photo. Press the button twice to skip to the beginning of the previous track. Press the button repeatedly to go back through the previous chapters or tracks. When video content is playing on Blu-ray Disc recordings and DVDs, press the Pause button first; afterwards, each subsequent press of the Previous/Step button reverses the video one frame.

Next/Step Button: Press this button once to skip to the beginning of the next track or, when viewing photos, to the next photo. Press the button repeatedly to advance through the next chapters or tracks. When video content is playing, press the Pause button first; afterwards, each subsequent press of the Next/Step button advances the video one frame.

Search/Slow Reverse Button: Press this button to reverse through a disc track. For Blu-ray Disc recordings and DVDs, each press cycles through 2x, 4x, 8x, 16x and 32x reverse speed. Pressing the button while a Blu-ray Disc recording or DVD is paused will reverse through the chapter in slow motion. Each press cycles through 1/2, 1/4, 1/8 and 1/16 normal speed.

Search/Slow Forward Button: Press this button to fast-forward through the current disc track. For Blu-ray Disc recordings and DVDs, each press cycles through 2x, 4x, 8x, 16x and 32x normal speed. Pressing the button while a Blu-ray Disc recording or DVD is paused will play through the chapter in slow motion. Each press cycles through 1/2, 1/4, 1/8 and 1/16 normal speed.

Stop Button: Press this button to stop playback at the current point. (Pressing the Play button will resume playback from this point.) Press the Stop button twice to stop playback fully. NOTE: Some settings and functions will be available only when the player is fully stopped.

Play Button: Press this button to play a disc that has been loaded into the player's disc drawer or a music file that has been highlighted on the on-screen menu. Pressing this button when viewing photos begins a slide show of all photos in the current folder.

Pause Button: Press this button to pause a disc or music file that is playing. Pressing the button while a Blu-ray Disc recording or DVD is playing will freeze-frame on the current video frame. Pressing the button while the disc is paused will resume play. Pressing this button while viewing photos freezes the current photo on the screen.

Volume +/- Buttons: Press these buttons to increase or decrease the volume of the BDS receiver's speaker outputs. NOTE: The Volume +/- buttons do not change the volume of the HDMI audio outputs.

IMPORTANT: Do not turn the Volume buttons up to or past the point where the audio from the speakers becomes distorted. Doing so can damage the speakers.

Mute Button: Press this button to mute the sound from the BDS receiver's speaker outputs. Press the button again to un-mute the sound. NOTE: The Mute button does not mute the HDMI audio outputs.

Channel +/- Buttons: When Radio is the source selected on the remote control, the Channel +/- buttons select the next higher or lower preset station.

Bookmark (Green) Button: Press this button to activate the Bookmark function. See *Bookmark Function*, on page 25, for more information.

Thumbnail (Yellow) Button: Press this button while playing a photo slide show to display thumbnail images of all photos in the slide show.

Program (Red) Button: Press this button to create a programmed playback list for the currently-playing disc. See *Programmed Play*, on page 25, for more information.

Zoom (Blue) Button: Press the Zoom button to zoom in on or recede from a video image or slide. Use the Navigation buttons to zoom in on different sections of the image. NOTE: This function is disc-dependent for Blu-ray Disc recordings and DVDs. Not all discs can be zoomed in on.

Red, Green, Yellow and Blue Buttons: When the BDS is playing a Blu-ray Disc recording, these buttons can activate features and menus that may vary from disc to disc. Refer to the menu instructions for each particular disc for more information. NOTE: These Blu-ray Disc functions may override the Bookmark, Thumbnail, Program and Zoom functions.

Preparing the Remote Control

Installing the Batteries

Your BDS system remote control uses 3 AAA batteries (supplied). Insert the batteries as shown in the illustration, making sure to observe the correct polarity.

Using the Remote

When using the remote, remember to aim it toward the receiver's front panel. Make sure that no objects, such as furniture, block the remote's view of the receiver. Bright lights, fluorescent lights, and plasma-video displays may interfere with the function of the remote.

- The remote has a range of about 20 feet (6.1m), depending on the lighting conditions.
- You can use the remote at an angle of up to 30° to either side of the BDS receiver.

If the remote seems to operate intermittently, or if pressing a button on the remote does not cause one of the buttons to light up, make sure that the batteries are inserted correctly. If the remote still operates intermittently, replace all three batteries with new ones.

Programming the Remote

In addition to controlling the BDS receiver, you can program the remote to control one auxiliary (Aux) component. The remote is also capable of learning codes directly from other remotes. This ability allows you to combine learned commands with programmed codes, making the remote capable of controlling more than one Aux component. Typical Aux components would be your TV, a satellite receiver or a cable receiver.

The remote will control the Aux component(s) only when the Aux source button has been pressed. Pressing any other source button will put the remote back into the BDS receiver control mode.

To program the remote to control an Aux component:

1. Look up the codes for the product type (e.g. TV, cable TV box) and the brand name of your source in the *Aux Component Remote-Control Code List*, on page 31.
2. Turn your auxiliary component on.
3. Press and hold the Aux button for three seconds as it turns red, goes dark and turns red again. Then release the button.

NOTE: The remote will remain in the programming mode for 20 seconds. You must perform Step 4 within 20 seconds.

4. Aim the remote toward the component you just turned on and enter a code number from Step 1, above. If the component turns off, check that its own remote-control buttons control the component as expected. If they do, press the Aux button again to save the code. The button will flash three times and the remote will exit the programming mode.
5. If any of the buttons do not work as expected, or if the device does not turn off when you enter the code number, repeat Step 4 with another code number from the list for that manufacturer.

6. If you run out of codes, you can search through all of the codes in the remote's library for that product type.
 - a) Press and hold the Aux button for three seconds. The button will turn red, go dark and turn red again. Then release the button.
 - b) For a conventional US TV, enter "0999"; for a conventional EU TV, enter "1999"; for an HDTV, enter "2999"; for a US cable box, enter "3999"; for an EU cable box, enter "4999"; for a US satellite tuner, enter "5999"; for an EU satellite tuner, enter "6999."
 - c) Aim the remote control toward the component and press the remote's Cursor Up button. Each press of the button sends the "Power" signal for one setup code number. Holding down the Cursor Up button quickly scans through all of the setup code numbers.
 - d) Release the Cursor Up button as soon as the component turns off. If you pass the correct setup code number, you can return to it by pressing the Cursor Down button, one setup code number at a time, until the component turns back on.
 - e) Check that the other remote-control buttons control the component as expected. If they do, press the Aux source selector button again to save the code. The button will flash three times, and the remote will exit the programming mode.
 - f) If the remote does not operate as expected, repeat Steps c — e. Note that some components may not respond to all of the above commands and may support only some of the commands listed.

To teach individual button codes to the remote:

You can teach codes from other component remotes onto the BDS receiver remote buttons shown shaded in the following illustration:

1. Place the BDS remote and the remote from which you want it to learn codes head-to-head about 1 inch (2.5cm) apart, with their IR transmitter windows facing each other.
2. Press and hold the Settings button on the BDS receiver remote for more than three seconds. The remote's Aux button will light up.
3. Press the button on the BDS receiver remote to which you want to teach the command. The Learn mode will remain active for 20 seconds after the button is pushed.
4. Press the button on the other remote that you want to "teach" to the BDS receiver remote. When the IR code has been received and stored, the Aux button's LED will flash three times, and the BDS receiver remote will remain in the learning mode, ready to learn another code. If no IR code is received within 20 seconds, the Aux LED will flash rapidly several times, and the remote will exit the learning mode. To resume programming, return to Step 2.
5. Repeat Step 3 and Step 4 for each command you want to teach the BDS receiver remote. **NOTE:** If the Aux button's LED goes out at any time, you will need to begin again from Step 2.

Programming Remote Control "Punch-Through" Commands

After programming the remote to control an auxiliary (Aux) component, you can also program it so it will control the Aux component's channel up/down and transport functions (Play, Pause, etc.) even when the remote is not in the Aux-control mode. For example, if the

remote is programmed to operate your TV in the Aux control mode, you can also have the TV's channel +/- functions "punch through" and operate even when the remote is in the Disc, Radio or iPod control modes.

1. Press and hold the button for the main device the remote will be operating. The button will light up, go dark and then light up again. Release the button.
2. Select the type of punch-through programming.
 - a) For "punch-through" channel control, press the Channel Up button.
 - b) For "punch-through" transport control, press the Play button.
3. Press the Aux button. The original source button will flash to confirm.

You can repeat Step 1 – Step 3 for any of the remote's source-selector buttons (Aux, Radio etc.). NOTE: "Punch-through" channel and transport commands will override the existing commands for those buttons in the source modes you program.

To undo "punch-through" programming, follow the same steps as above, but press the same source selector button in Step 1 and Step 3.

Using the Remote After it is Programmed

Pressing the remote's Aux source-selector button will put the remote into the auxiliary-control mode, and it will control the auxiliary component(s) via the codes you have programmed into it.

To switch the remote back to the BDS receiver-control mode from the auxiliary-control mode, press any one of these buttons: Disc, Radio, iPod or Home.

Setting Up the Receiver

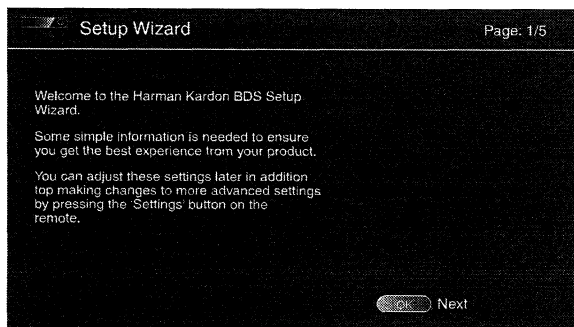

NOTE: The menu screens shown in this manual are for illustrative purposes and may differ somewhat from the actual displays.

To set up your BDS system, you will use the remote to navigate through all of the on-screen menus and make selections from them.

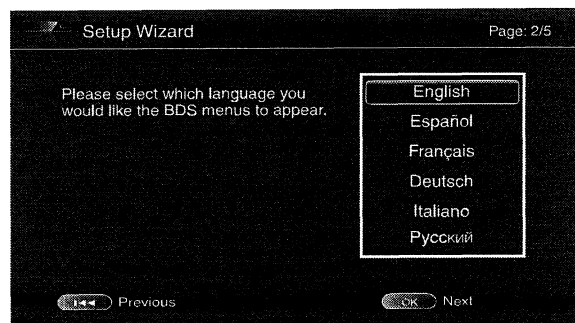

- Use the Cursor Up/Down buttons to navigate through the menu list. When an item is highlighted, a border will appear around it.
- To select a highlighted item, press the OK button. The screen will change depending on your selection.
- To return to the previous screen, press the Exit button.

Setup Wizard

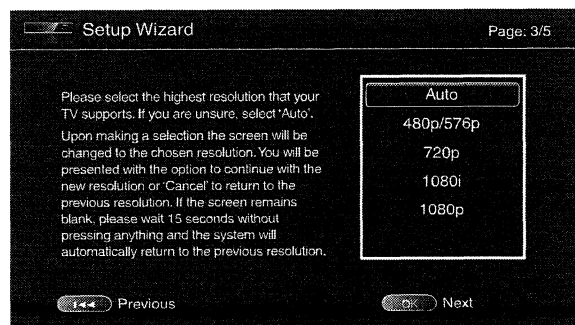

When you turn your BDS receiver on for the first time, the on-screen menu will display the Setup Wizard.

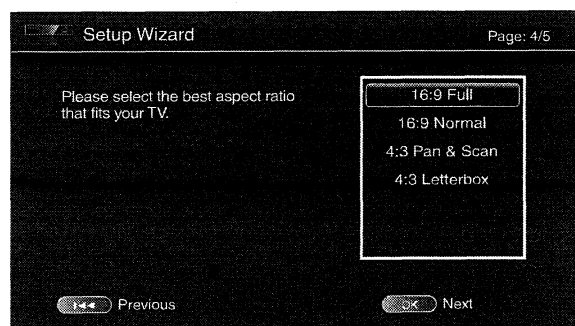

Before you can use your BDS system, you need to set the language and make a few basic settings so that the BDS receiver's video output will work properly with your TV. Press the OK button and the Wizard's language screen will appear.

After setting the language you want the on-screen menus to use, press the OK button, and the Wizard's TV-resolution screen will appear.

After selecting your TV's highest resolution, press the OK button and the Wizard's aspect-ratio screen will appear. NOTE: If you're unsure of your TV's highest resolution, select "Auto," and BDS will automatically select the optimal resolution for you.

After selecting the aspect ratio that best fits your TV, press the OK button to save your setting, and then press it again to exit the Setup Wizard.
