Getting Started

REMOTE CONTROLS

RM-C382 AV-36150 • AV-32150 AV-27150

RM-C381 AV-36120 • AV-32120

RM-C205 AV-32115

Changing the Batteries

Be sure to use only size AA batteries.

- Raise the latch on the remote's back cover or push down on the back cover and slide towards the bottom to remove it.
- Insert two AA batteries (supplied), carefully noting the "+" and "-" markings on the batteries and on the remote control. To avoid a potential short circuit, insert the "-" end first.
- When batteries are installed, snap the back cover into place.
- If the remote control acts erratically, replace the batteries. Typical battery life is six months to one year.
- We recommend using alkaline batteries for longer battery life.

When you change the batteries, try to complete the task within three minutes. If you take longer than three minutes, the remote control codes for your VCR and/or Cable Box may have to be reset (page 12-13).

Getting Started

POWER

- Press the Power button on the remote control or the front panel of the TV. The ON TIMER lamp will glow red.
- Make sure the TV/CATV switch on the remote is set to TV (RM-C381 and RM-C382 only). Move the switch to CATV only if you plan to operate a cable box. On the CATV setting the remote will only operate the cable box functions.
- To turn the power off, press the Power button again. The ON TIMER lamp will go out.
- The ON TIMER lamp will glow red when the On/Off Timer is set (page 24), even when the TV power is off.

ADJUSTING VOLUME

To control the volume level, use the Volume+/- buttons on the remote control or on the TV's front panel. Use the Volume - button to lower the volume. Press the Volume+ button to raise the volume.

Press the Muting button to instantly turn the volume to zero. Press Muting again to return to the previous volume level.

CHANGING CHANNELS

10 key direct access

To move directly to a specific channel, press that channel's numbers on the remote's 10 key pad. For single-digit channel numbers, press "0" then the channel number. For channels above 100, press the 100+ button, then the remaining two digits on the 10 key pad.

2 CHANNEL -/+ BUTTON

To scan through the channels, press either the Channel + or Channel - button. You will move through the channels in numerical order.

After you operate the Auto Tuner Setup (page 15), all of the empty channels will be removed from scanning.
 When you scan you will only receive clear, active channels.

Hyperscan

With JVC's Hyperscan feature you can zip through the channels at a rate of five per second. To use Hyperscan, press and hold either the Channel+ or Channel- buttons. After the first few channels scan at normal speed, the rest will move by at five per second. To scan at normal speed, press and release the Channel+/- button.

Regular Return

Press and release the Return+ button to return to the previous channel viewed. For example, select a channel, then select another channel using the 10 key pad buttons. You can now flip back and forth between these two channels by pressing Return+.

4 RETURN+

With RETURN+ you can program your TV to always return to a specific channel. Press and hold down the RETURN+ button for three seconds. The message, "RETURN CHANNEL PROGRAMMED!" will appear on-screen. Now when you scan through the channels, pressing RETURN+ will bring you back to your programmed channel.

To cancel the Return+ channel, press and hold the Return+ button for three seconds. The message "RETURN CHANNEL CANCELLED!" will appear on-screen.

Pressing any number key or turning off the TV will also cancel the RETURN+ channel.

Remote Programming

Setting the CATV & VCR Codes

You can program your remote to operate your cable box or satellite receiver by using the instructions and codes listed below. If the equipment does not respond to any of the codes listed below or to the code search function, use the remote control supplied by the manufacturer.

Cable Box or Satellite setup (All models except AV-32115)

The remote control is programmed with CATV and/or Satellite codes for power on, power off, channel up, channel down, and 10 key operation.

- 1) Find the CATV/Satellite brand from the list of codes shown below.
- 2) Slide the 2-way selector switch to "CATV".
- 3) Press and hold down the Display button.
- 4) With the DISPLAY button held down, enter the first code number listed using the 10 key pad.
- 5) Release the Display button.
- 6) Confirm the operation of the Cable Box/Satellite receiver.
- If your CATV or Satellite box does not respond to the first code, try the others listed. If it does not respond to any code, try the Search Codes Function at the bottom of the page.

Search Codes Function:

- 1) Slide the 2-Way Mode Selector switch to CATV.
- 2) Press the TV Power and Return+ buttons. Hold for at least three seconds and release.
- 3) Press TV Power, see if the CATV or Satellite box responds.
- 4) If there was a response, press Return+. The operating codes are now set. If there was no response, repeat Step 3. If you repeat Step 3 64 times without a response, use the remote control which came with the equipment.

Remote Programming

VCR setup

The remote control is programmed with VCR codes for power on, power off, play, stop, fast-forward, rewind, channel up, and channel down operation.

- 1) Find the VCR brand from the list of codes shown below.
- 2) Slide the 2-way selector switch to "TV".
- 3) Press and hold down the DISPLAY button.
- 4) With the DISPLAY button held down, enter the first code number listed with the 10 key pad.
- 5) Release the Display button.
- 6) Confirm the operation of the VCR.
- If your VCR does not respond to the first code, try the others listed. If it does not respond to any code, try the Search Codes Function at the bottom of the page.
- To record, hold down the REC button on the remote and press PLAY.
- Some menufacturer's VCR's may not respond to the TV/VCR button, even if other buttons work properly.
- AV-32115 Users: The model RM-C205 remote control can only be used with JVC-brand VCR's

Search Codes Function:

- 1) Slide the 2-Way Mode Selector switch to TV.
- 2) Press the VCR Power and Return+ buttons. Hold for at least three seconds and release.
- 3) Press VCR Power, see if the VCR responds.
- 4) If there was a response, press Return+. The operating codes are now set. If there was no response, repeat Step 3. If you repeat Step 3.74 times without a response, use the manufacturers remote control which came with the VCR.
