Programming the Remote Control

The remote control is preset to operate Sony brand video equipment.

Sony Equipment	Programmable Code Number
DVD/VCR	601 (Sony Dream System)
SAT/Cable	801 (Sony Satellite Receiver)

Follow the steps below to program your TV's remote control to operate the non-Sony video equipment.

Find the three-digit code for your equipment from the "Manufacturer's Codes" listed on page 35. If more than one code number is listed, try entering from the code listed first.

- 1 Press and hold the **(DVD/VCR)** or **(SAT/CABLE)** FUNCTION button you want to program on the remote control and press the **DISPLAY** button simultaneously. The selected FUNCTION button (DVD/VCR or SAT/CABLE) will flash.
- 2 Enter the three-digit manufacturer's code number using the **0-9** buttons while the button is lit, approximately 10 seconds.
- 3 Press **(ENT)** button.

When the programming is correct, the selected FUNCTION button will flash twice slowly, and when not, flashes five times quickly.

To check if the code works

Aim your TV's remote control at the equipment, and press the green **POWER** button. If the equipment responds, the programming is completed. If not, try the next code listed.

- ⚠ If no code is input within the above specified time, or an invalid or incorrect code number is input, the remote control automatically goes back to the previous setting.
- ⚠ In some cases, you may not be able to program your remote control to operate other equipment. In such cases, use the equipment's own remote control.
- ⚠ Dead batteries or removing the batteries may cause the programmable codes to be lost and revert back to factory settings. Reprogramming the codes may be necessary.

Insert two size AA batteries (supplied) by matching the **+** and **-** on the batteries to the diagram inside the remote control's battery compartment.
